Project : Transparent and Genuine Charity Application

Status : Submitted

1. What Progress you have made in the Project ?

Finally we also created the donation functionality for the users and integrated the Ethereum Smart contract functions in the backend so that all the appropriate events can be carried out alongside Blockchain which was our actual goal.

2. What challenge you have faced ?

We didnt have much resources to refer for integrating the smart contracts into our website as We designed our website in .net framework and not much is available for that on the internet.

3. What support you need ?

It would be better if we can get support in terms of resources from our mentor or contact of any person who possessed experience in building this kind of cross functional applications.

4. Which literature you have referred ?
